

## Fonts for Display Panels

- Choose a font style and text size that is easy to read:

- Body text should be between **24** and **36** points.

- Headings between **48** and **72** points.

- Titles **72** to **96** points.

- Captions for illustrations between **18** and **24** points.

- AVOID USING ALL CAPITALS BECAUSE IT IS HARDER TO READ

- *Use italics sparingly for the same reason*

- Use *cursive, decorative or unusual* fonts only occasionally for drawing attention to a title or to create a particular effect.

- A graphic designer will help make sure that text is spaced well, paragraphs are kept together and margins are adequate and used effectively.
